## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-10,17-19 are rejected under 35 USC 103(a) as being unpatentable over Boyer '131 in view of Davies '071.

Boyer (see especially Figs. 1,2) discloses all features claimed, including the arranging the size and location of the playing modules 102 in such a manner as to require "less reach" for the player (Col. 7 lines 39-64). Davies discloses a method for producing note relationships which involve geometric arrangements of notes such that a player can hold down a triad of notes with one finger (Col. 7 lines 17-32). It would have been obvious to adapt the Boyer teachings with those of Davies, so as to allow the multiple playing of notes.

Applicant argues that Davies is directed towards a stringed musical instrument, not towards a keyboard. However, Davies is directed towards a keyboard musical instrument and that the Davies inventive concept applies equally to stringed instruments and keyboards (Abstract, last sentence; Col. 5, lines 24-53).

Regarding Claim 19, Davies suggests that "other musical keys" may be represented by the geometrical relationships taught (Col. 5 lines 14-19). An example of another "musical key" is a minor key as claimed. Thus Claim 19 is met.

Boyer '283, Davies '990, and Anderson et al are further cited to show related
